Highlights

MAX Sound
MAX Sound technology produces an instant boost in bass, maximizing volume performance and instantly creating the most impressive listening experience with just the touch of a button. Its sophisticated electronic circuitry calibrates existing sound and volume settings, instantly boosting bass and volume to maximum levels without distortion. The end result is a noticeable amplifying of both sound spectrum and volume and a potent audio boost that will add mileage to any music.

Bass Reflex Speakers
Bass Reflex Speakers delivers a deep bass experience. Differ from conventional loudspeakers, the addition of a bass pipe that is acoustically aligned to the woofer optimizes the low frequency roll-off. The result is a deep controlled bass and low distortion. Combined with the response of the woofer, it extends the overall low frequency sounds to create a whole new dimension of deep bass.

Karaoke
The Karaoke feature on your DVD player provides endless entertainment and maximum audio and singing enjoyment.You can enhance your performance by adding an 'echo' effect to your voice. The key controls allows you to choose the optimal key for your personal vocal range.

PlayDVD,VCD,MP3-CD,CD(RW)&Pict
The Philips player is compatible with most DVD and CD discs available in the market. DVD, (S)VCD, MP3-CD, CD(RW) and Picture CD - all of them can play on the player. SVCD stands for "Super VideoCD". The quality of a SVCD is much better than a VCD, especially much more sharpen picture than a VCD because of the higher resolution. CD(RW) is a shorthand term for a CD drive that can accept the common rewritable CD format.
